Effort

For this project, I put all of the data into CSV files for all nine years. I worked on making the legend and finding a color scheme for each of the three main variables. I also worked on putting in the text for the title and the sources.

My partner, Yinghao Wang, created the map, linked the data so that changing filters from the dropdown menu and selecting toggle buttons would change the appearance of the map. He also worked on the content for the tooltip and implementing the year slider.
